Projects

Online Book-shop [Team Project]

Full-Stack Project: [Live Site](#) | [Client Side Code](#) | [Server Side Code](#)

- The site is an online book store. I have shown gorgeous designs in UI. The user looks like some products and is at ease purchased to the product. And I think it is a good experience for every user.
- My role is as a Team leader, Implement Redux, CRUD operation, user creation, and showing specific user data. And implement Payment by Stripe.
- I used React Js and Redux on the client side and firebase for authentication in this project. I have used NodeJS MongoDB Express.js for the server[Admin Email: _masummx3@gmail.com, password: 123456].

Travel-Hardware-Industries

Full-Stack Project: [Live Site](#) | [Client Side Code](#) | [Server Side Code](#)

- The site is hardware industries. This is a full stack project
- I have shown simple designs in UI. We show some products, reviews, sales reports and some of our systems.
- I used React Js on the client side and firebase for authentication in this project. I have used NodeJS MongoDB Express.js for the server.

Key-Two-Warehouse

Full-Stack Project: [Live Site](#) | [Client Side Code](#) | [Server Side Code](#)

- The site is warehouse quality
- This site has shown products that are stored. Here you can increase the number of products and delete the product if you want.
- I used React Js on the client side and firebase for authentication in this project. I have used NodeJS MongoDB Express.js for the server.
